This is a mug lid. It’s an ordinary lid. It is a spinning mug lid. The reason why it is called a spinning mug lid, because it spins.

You can spin this top after removing it from the mug.

It also keeps hot beverages hot for a little longer, with or without a mug warmer.

It is built as a thermos lid, thermos cover or thermos top. What ever you want to call it. And not only it is used for a mug, it can also be used for other tings.

Other things can be cover with this lid.

Tags: Lid, Cover, Top, Guard, Coaster

Contents:

1. Mug Warmer, used for keeping beverages warm.
2. Spinning Top, used for fun. It spins around in circles until it stops spinning.
3. Coaster, used for hot and cold soft drinks. It protects the furniture.
